**Introduction of Oujian
Special Products**

◆ ◆ ◆ Background Information ◆ ◆ ◆

Due to the dangerous characteristics of hazardous chemicals, which are easy to cause burning, explosion, poisoning, burn and other human casualties and property losses, the General Administration of Customs further strengthened the inspection and supervision of hazardous chemicals. Since April 13, 2023, the General Administration of Customs has implemented the reform of the inspection mode for imported hazardous chemicals nationwide, and implemented the "100% document inspection and verification + port inspection or destination inspection". The Customs shall, in accordance with the attributes of dangerous chemicals and the types of packaging of dangerous goods, set the links (places) and proportions of inspection for the classification of imported dangerous chemicals.

December 1, 2022

在Shanghai Pujiang Customs will implement the "100% document verification + port inspection or destination inspection" mode for the pilot import of hazardous chemicals. The pilot work will last for 3 months starting from December 1, 2022.

February 1, 2023

The reform of the inspection and supervision mode of imported hazardous chemicals has been carried out in Shanghai Customs region.

March 31, 2023

Single window import declaration added "80000001- enterprise compliance declaration, 80000002- inhibitor or stabilizer description, 80000003- danger publicity label, 80000004- safety data sheet" four types of attached documents.

April 13, 2023

The reform of the inspection mode for imported dangerous chemicals was carried out nationwide.

Part 01

Enterprise-

Viewpoint Essentials for Dangerous Chemical Declaration

Different Concept

Dangerous chemicals: highly toxic chemicals and other dangerous chemical goods that are toxic, corrosive, explosive, burning, combustible and harmful to human body, facilities and the environment: Substances and articles that have dangerous properties such as explosion, inflammability, poisoning, infection, corrosion and radioactivity, and which are likely to cause personal injury or death, property damage or environmental pollution during transportation, storage, production, operation, use and disposal and require special protection.

Different Classification Basis

Dangerous goods: Dangerous goods are classified according to the United Nations Recommendations on the Transport of Dangerous Goods - Model Regulations (TDG), the International Maritime Dangerous Goods Code and other dangerous chemicals: Dangerous chemicals are classified according to the Global Uniform System for Classification and Labelling of Chemicals (GHS).

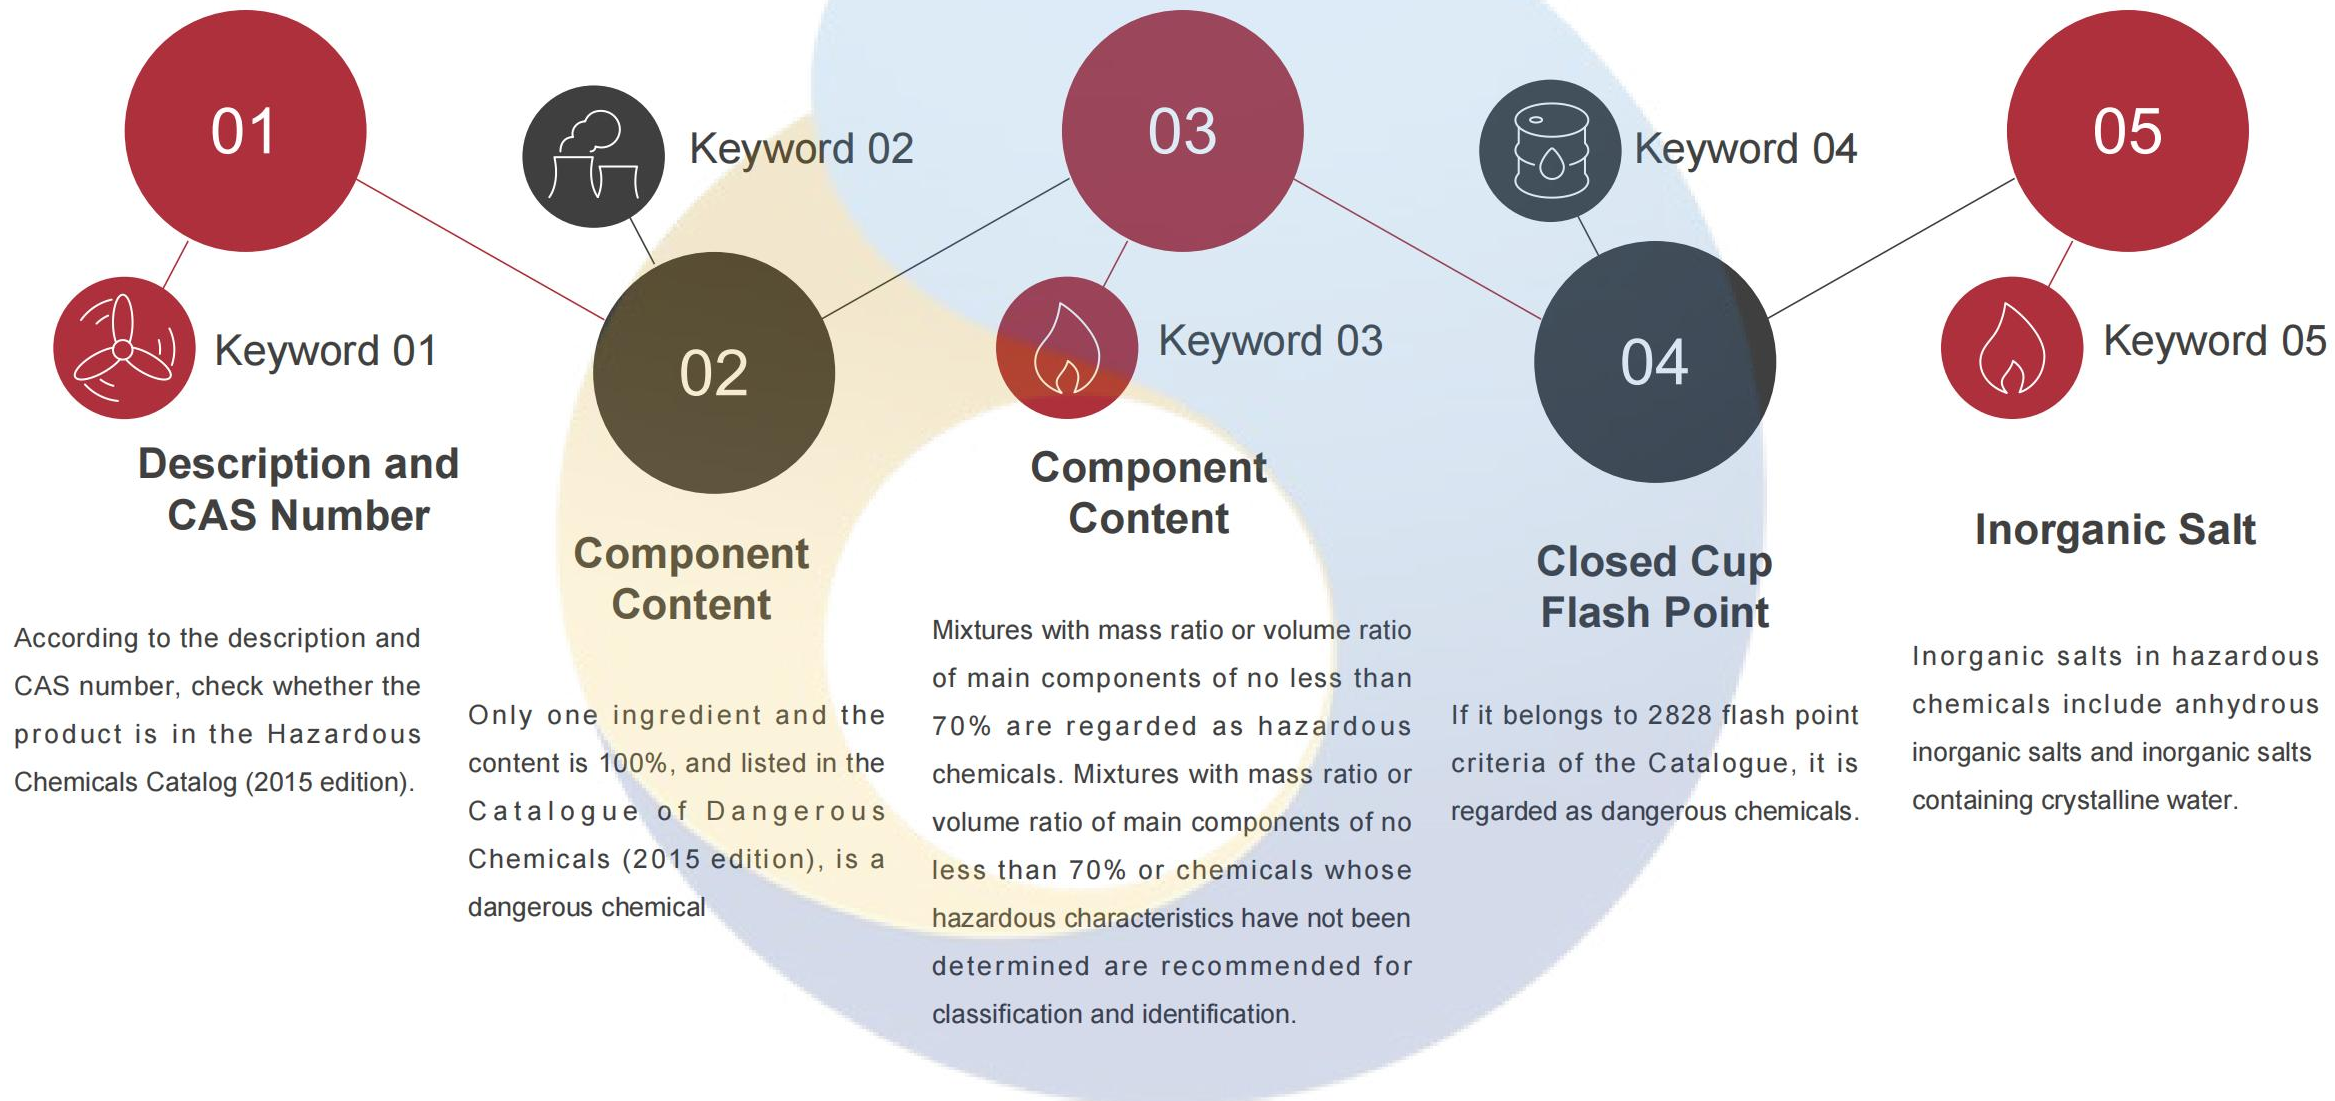

Different Danger Classes

Dangerous goods: 3,523 items in Name List of Dangerous Goods (GB12268-2012) 9 categories of harm; hazardous chemicals: GHS classifies the hazardous characteristics of chemicals into 29 categories, including 17 physical hazards, 10 health hazards and 2 environmental hazards.

Different Regulatory Bodies

Hazardous chemicals: emergency management department; Dangerous goods: transportation department

OPTION 01

01

Kind of Packages

Note: If the cargo attribute is selected as "31- Hazardous Chemicals in Bulk", the package type code can only be selected as "00 bulk", "01 Bare container" or "04 ball can".

OPTION 02

02

Name of Inspection and Quarantine

Note: non-hazardous chemicals, but only hazardous chemicals are included in the inspection and quarantine code list, so you can declare that your products are not hazardous chemicals when making declaration, and you do not need to make additional classification and identification of hazardous chemicals. .

OPTION 03

03

Property of Goods

Declare truthfully according to the attributes of goods listed in the Catalogue of Hazardous Chemicals

OPTION 04

04

Information of Dangerous Goods

For dangerous goods, the dangerous category, packing category (except for products in bulk), UN dangerous Goods number (UN number) and UN dangerous goods packing mark shall be faithfully provided.

OPTION 01

01

Submission of Documents

Import of hazardous chemicals shall submit Declaration of Compliance, Description of Inhibitor Stabilizer, Public Label and MSDS

OPTION 02

02

Four new categories of accompanying documents added to the single window

""80000001- Enterprise Compliance Statement, 80000002- Inhibitor or stabilizer description, 80000003- Risk Publicity label, 80000004- Safety Data Sheet" four types of documents are attached

OPTION 03

03

Match up

The corresponding relation of item number should be entered when selecting the above type with attached documents.

OPTION 04

04

Receipt Query

Check the inspection notice through the "Single Window of China International Trade" in time .

Part 02

Customs Viewpoint- Key Points of Customs Control over Hazardous Chemicals

01

Consistency of System Declaration Information

"The correspondence between "goods attribute" and "name of inspection and quarantine"; The "name of inspection and quarantine" corresponds to the "danger class" in the information of dangerous goods; Whether the package category displayed in Package UN Tag is higher or equal to that displayed in Package Category.

The system Declaration Information Consistent with the Material Information

The consistency between the dangerous goods information filled in by the system and the information in the MSDS;
Consistency between the "Packaging UN mark" filled in by the system and the enterprise compliance statement

02

03

Consistency of Information Contained in Material

The consistency of conformity declaration with the UN number and hazard type in the Chinese safety data sheet; The consistency of Chinese public label with MSDS product name, major hazardous components, signal word, pictograph, hazard description, prevention description, production/supplier information, etc .

01

Whether the product package has a hazard publicity label in Chinese, and whether it is accompanied by Chinese MSDS.

Whether the product packaging, publicity labels and MSDS meet the requirements of the General Administration of Customs Announcement No. 129 in 2020.

02

03

Check whether hazardous chemicals leak out; Confirm the protection and transportation adaptability of the package.

Part 03

Import Dangerous Chemicals -

Something the Enterprises
Most Concerned About

Yangshan Port of Shanghai

There are many types of dangerous goods accepted at the port of Shanghai, and very few of them need to be loaded and unloaded directly. Most of the containers can be shipped to the port by direct flight. For FCL inspection, the containers need to be moved to Yangshan Warehouse for inspection, and the inspection time limit is 3-5 working days. Enterprises should pay special attention to maritime dangerous goods declaration.

Tianjin Port

Before the discharge of import dangerous chemicals, the danger declaration shall be submitted to the Newport Office, East Xinjiang Office and Danger Prevention Department of the Maritime Safety Administration, and the shipping agent shall handle it directly. Submit the documents to the shipping agent 5 working days before the ship arrives at port. Be sure to complete the cargo import declaration before the ship arrives at the port (the terminal shall receive the electronic information of customs release or inspection. Otherwise they will be brought back by the original ship)

Nansha Port of Guangzhou

Nansha Port of Guangzhou can receive many types of dangerous goods, the dock storage space is sufficient, large ships can sail directly to the port, the inspection time limit is accelerated, within about 2 working days.

Yantian Port in Shenzhen

Shenzhen Yantian Port can accept many types of dangerous goods. The customs is familiar with the classification of dangerous goods. Large ships can sail to the port directly. Because of more goods, inspection cost more time.

Laws and Regulations and Inspection Basis

- √ Law of The People's Republic of China on Import and Export Commodity Inspection
- √ Regulations for the Implementation of the Import and Export Commodity Inspection Law of the People's Republic of China
- √ Regulations on the Safety Administration of Hazardous Chemicals (Decree No. 591 of The State Council)
- √ United Nations Uniform Global System for the Classification and Labelling of Chemicals (GHS)
- √ Model United Nations Recommendations on the Transport of Dangerous Goods (TDG Regulations)
- √ Code for Classification and Labeling of Hazardous Chemicals (GB30000 Series standard)

Part 04

Introduction of Special Products of Shanghai
Oujian Network Development Group Co., LTD-
**logistics and Customs Clearance Services for
Import of Used Mechanical and Electrical Products**

99%

The Pain Points

- How to apply for pre-shipment inspection of used mechanical and electrical equipment?
- What preparatory work needs to be done to ensure the smooth import of used mechanical and electrical equipment?
- In the process of customs clearance, the customs questioned the HS code and price of the used mechanical and electrical equipment ?
- Can't the customs inspection proceed smoothly because of packing problem?

Needs of Enterprises

One-stop solution to the above pain points, efficient and compliant.

Introduction of Service

We provide domestic and foreign packaging, logistics, customs declaration, declaration of inspection and transportation and other supply chain services for customers.

services for import of Used mechanical and electrical products

Contacts: Yangxiaoyan

Contact Details: 18701751979

Email: yangxiaoyan@thecustoms.com.cn

01

Services in Domestic

CCIC record of used mechanical and electrical equipment, Application for used equipment 3C exemption from Import License of Mechanical and electrical products, commodity classification and estimated price, customs declaration, inspection, transportation and distribution, local commodity inspection processing, etc

02

Service Abroad

Factory equipment rectification CCIC foreign inspection, packing, customs declaration at port of departure, international transportation, etc

03

Value - Added Service

Design scheme: According to the situation of the enterprise, we give the optimal cost scheme; before delivery: we offer CCIC inspection site guidance at the loading place; before import: we provide commodity pre-classification in case of changes after import; pre-audit: we provide customers with reasonable price suggestions; emergency treatment: we offer a 24 hours expert team response.
